## Projects :

Visit my website to see the all project = <https://ashwanitiwari.webgrowindia.in/>

1: mahipalcity.com

- This is a website built on PHP, in which the admin can add and remove both games and numbers. And it has features like login, logout, change password, etc.
- The main feature in this is that new games are automatically added to the database every day. For which I have used the **CRON JOB** of hosting.

2: loanswalah.com

- This is a Loan **prediction** website.
- We can add banks in it and all the things are dynamic which are controlled from admin panel.

3: Blogging website

- This is a blog website, all the blogs are visible through API.
- There are **2 APIs** installed on this website, out of which 1st is newsapi.org and 2nd is newsdata.io
